Subject: Microsoft Litigation

US Dept. of Justice-Microsoft Anti-trust comments:

I consider myself an average American. My father, my brother and I all received Honorable Discharges from full enlistments in either the US Marine Corps or the US Navy. And, having almost 40 years of technical and management experience in Computers and Telecommunications technologies with several of our largest corporations, I feel an urgency to speak in the face of threatening censorship and secret political employee profiling.

America is sick and despondent with the loss of it's freedom and impending doom to her dream. At a time when ad agencies dictate to the US Congress and representative government have generally sold the American Dream down the river, it is indeed a stretch to ask for your compliance to uphold the law, placing your family and career at risk.

But, Microsoft and company have brought tyranny to the American consciousness in ways that Bin Laden and our would be destroyers only dream about - the end of freedom - the end of the American Dream is in sight.

Read the Global media - Microsoft is E V I L.

Microsoft's family of crime should not only be splintered beyond recognition, but these criminal perpetrators should receive the just rewards of any terrorist hoodlums. They have accomplished through conspiracy and larceny what no outside terrorist can or will do to America, by destroying the freedom and spirit of the American workplace from within. Microsoft has left a trail of tears and broken laws, dismembered hearts and withered creativity; an infection, a collection of rotten, tainted, stolen technologies - the ghost in the machine beckons and cries out for justice.

Now, we all work for the crime family regardless of our beliefs. The Quality principles of America's National Treasure, Dr. W. Edwards Deming, which brought us unrivaled teamwork and prosperity have been co-opted, distorted and twisted to serve a demonic ideology. A continuous stream of disasters is ample evidence of Quality draining from the American infrastructure.

Without real choice, we are just slaves. Without choice, there is only propaganda. Without this basic choice, American consciousness will be divided in digital warfare for the century to come, unless of course, she succumbs to grim tyranny altogether.

Please, in this 11th hour of our freedom, try to preserve the dream that so many in our families have fought and died for.

Thank you for your time and consideration,
